

Solution Brief: SAP BI Business Planning

Who we are:

TekLink International is a leading implementer of SAP Business Intelligence and Analytics for many Fortune 500 Companies. Our business expertise crosses many industries, including Consumer Products, IM&C, Healthcare, and Automotive.

TekLink consultants are internationally recognized experts having deep industry knowledge combined with years of implementation experience.

Come see the difference!

Business Planning Offerings

TekLink provides organizations expert assistance migrating their current planning process to SAP business planning. Often business planning in an organization can be a long, painful spreadsheet driven process that does not deliver valuable information to management. SAP business planning enables streamlined business planning and forecasting processes utilizing integrated data from BI. TekLink will help you transform your planning process into one that delivers reliable, timely, integrated information.

Strategy

With SAP's acquisition of Outlooksoft and Business Objects, the options for planning in SAP have grown. Choosing the right product and development strategy is a critical step in the process. TekLink experts have in-depth experience with SAP tools and a tight relationship with SAP to ensure the latest information. We will help you determine the best SAP solution and implementation strategy for your business planning needs.

Delivery

Building an efficient planning application requires business knowledge as well as technical experience. Poorly designed planning applications lead to poor performance and user rejection. TekLink consultants have real-world business acumen and years of SAP implementation experience. This enables TekLink to help you create a user friendly, highly performing planning application.

Peace of Mind

With the **Financial Times** reporting in 2006 that **"Some 18 per cent of IT projects failing and a further 53 per cent running over-budget, over-deadline or short on performance targets"**, TekLink is a premier partner who is uniquely positioned to consistently deliver high quality, on time and on budget.

It is therefore no wonder why Fortune 500 companies such as **Kellogg, Wrigley, John Deere, Molex, Merisant, Hartmarx** and others choose TekLink for **Peace of Mind**.

What our Clients are Saying:

"TekLink was critical and essential to our successful implementation. They followed through on their commitments being on time and on budget with deliverables. We have complete trust in their ability to deliver quality services that exceed expectation." **Tom Bowen, Manager SAP Business Intelligence Molex Inc.**

Our Approach:

Companies which run SAP have a myriad of consulting choices in today's market. It can be a daunting task trying to find the 'right' consulting vendor sifting through all the marketing hype. What we at TekLink know and practice, is that at the end of the day, each of our customers deserve:

- A Mutual Trust Relationship
- High Quality, Every Day
- Unparalleled Thought Leadership
- Flexible Solution Options
- Cost Effective Solutions
- Advance Technology Expertise
- Can Do Attitude

BI Business Planning Offerings

Service	Benefits
SAP Planning Implementations	Build an effective, well designed planning solution that delivers management the information they need while creating an easy to use, user friendly interface.
SAP Planning Upgrades	Upgrade you planning applications and take advantage of new functionality delivered by SAP thus adding value with your upgrade.
BPS to IP conversions	Migrate you BPS application to IP and take advantage of the benefits of input ready queries.
IP Implementations	Take advantage of SAP's IP tool to create input ready queries and design a robust integrated planning application using a web or excel interface.
BPC Implementations	Utilize SAP's latest acquisition in the planning area to create user-friendly dynamic planning applications.
SAP Planning Re-Design	TekLink can help you correct existing planning applications that are unwieldy. If users are frequently locked out by other users and the application is slow, unstable and has a poor user interface, we can eliminate these issues.
SAP Planning Custom Workshops	Accelerate your team's knowledge transfer by using TekLink's BI Team to conduct internal knowledge workshops for IT or End Users.
SAP Planning Design and Performance Review	Determine the health of your planning system. Reduce the risk of Bad Data Models, Poor Performance and Poorly Developed Planning Functions by leveraging TekLink's SAP BI Platinum team to drive your SAP planning improvements!
